EXPERIMENTS MANIFEST

UNCLASSIFIED

ARCHIVED & RECLASSIFIED AS OF JANUARY 2000

This document contains classified information affectingtheResearch Asset Protection of the Quantum Atomic Energy Corporation within the Epsilon-8 Confidentiality Policy, EICP30-01A and 30-01B. Its transmission or the revelation of its contents in any manner to an unauthorized person is prohibited and will be apprehended accordingly by the internal intelligencesubsidiary.

MADISON RESEARCH CENTER EPSILON-8 BIOLOGICAL RESEARCH LABORATORIES

REPORT LOGGED07/MAR/1982

CONFIDENTIAL

CONFIDENTIAL

PROJECT BLACKWATER	*1974-PRESENT*

PRIMARY INFO

STATUS	PRIMED
SUBJECTS	10 PLUS 30
CONCLUSION	UNCLASSIFIED
L. RESEARCHER	DR. F. Everson

SYNOPSIS

PROCESS OF DIRECT INJECTION INTO A BLOODSTREAM OF MICROAGENTS WITH THE CONTROLLING THE SUBJECT'S PRIMARY COGNITIVE FEEDBACK METHODS.

THE MICROAGENT IS RECYCLED THROUGH THE ARTERIAL SYSTEM UNTIL REACHING AND ADHERING TO THE BRAIN UNTIL AWAITED ACTIVATION.

TO ACTIVATE, A DISSOLVED SOLUTION OF [redacted] WILL BE DELIVERED THROUGH THE SAME METHODS TO THE BRAIN, AND WILL RELEASE A NEW COMPOUND OF [redacted], A NEURONAL NEUTRALIZANT. THE NEW COMPOUND WILL BLOCK NEURONAL CONNECTIONS,
NOTABLY THOSE USED FOR THE NOREPINEPHRINE, DOPAMINE, AND CHOLINERGIC SYSTEMS. THE MICROAGENTS HAVE A DESIGNED EXPIRATION DATE OF
01/JAN/2000 AS PROJECT DEADLINE.

CONFIDENTIAL

PROJECT REDSTONE	*1974-1975*

PRIMARY INFO

STATUS	CONCLUDED
SUBJECTS	25
CONCLUSION	INCONCLUSIVE
L. RESEARCHER	DR. H. BROWN

SYNOPSIS

INJECTION OF SOLUTION CONTAINING 0.05 MOL COMPOUND OF [redacted]-[redacted] INTO USER WITH THE OBJECTIVE O SYNCHRONOUS DELAYED COAGULATION OF THE BLOOD AND CONSEQUENT DEATH.

COMPOUND IS PURPOSED TO RELEASE A REACTIVE AGENT ONCE RECYCLED AND SPREAD THROUGH THE BLOODSTREAM SYSTEM AND THAT WILL TRIGGER THE IMMUNOLOGICAL COMMENCE TO COAGULATE BLOOD.

EFFECT IS EXPECTED TO MANIFEST ***5*** HOURS AFTER BEING ADMINISTERED AND LASTS [redacted] MINUTES BEFORE EXPECTED USER DEATH DUE TO BLOOD DEPRIVATION.

UNDER CLASSIFICATION AS AN INGESTIBLE, BIOHAZARDOUS WEAPON WAS PLANNED FOR ***1986*** TO BE PRESENTED IN [redacted], [redacted], AND [redacted].

PROJECT HAS RESULTED IN MIXED RESULTS WITHA SURVIVAL RATE OF 28.5% WITH DEATHOF EXTREMITIES. MORE EXPERIMENTATION WILLBE NEEDED UPON OBTAINING MORE SUBJECTS.

CONFIDENTIAL

PROJECT MELANCHOLY	*1976-PRESENT*

PRIMARY INFO

STATUS	ONGOING
SUBJECTS	5 PLUS 70
CONCLUSION	MIXED RESULTS
L. RESEARCHER	DR. H. BROWN

SYNOPSIS

OPERATION COMPARABLE TO A LOBOTOMY SURGERY IN WHICH THE INSIDE CAVITY OF THE CRANIUM IS ACCESSED TO EXTRACT A SMALL PORTION OF THE SUBJECT'S BRAIN, THOUGH IN THIS CASE REPLACED WITH A MOTHERBOARD THAT COMMUNICATES WITH OTHER REGIONS OF THE BRAIN.

THE CHIP IS [redacted]*x*[redacted]*x*[redacted] *mm* IN SIZE AND COMMUNICATES THROUGH ARTIFICIAL SYNAPSES FORMED BY THE COMPOUND FORMULATED IN ***PROJECT BLACKWATER.***

THE MOTHERBOARD FEATURES A RADIOFREQUENCY ANTENNA TUNED INTO [redacted] ***MHz*** THAT RECEIVES MESSAGES TO RELAY BACK INTO THE CORRESPONDENT BRAIN AREAS.

MOTHERBOARD IMPLANTATION HAS BEEN NOTED TO HAVE A SURVIVAL RATE OF 68% AND 70% DURING AND AFTER THE OPERATION RESPECTIVELY.

SUBJECTS HAVE SHOWN SCHIZOPHRENIC BEHAVIOR CAUSED BY SUSPECTED INTERFERENCIES; SEVERE LACK OF BASIC COGNITIVE FUNCTIONS IS ALSO PRESENT.

Epsilon-8 The Epsilon-8 Program, aliased as simply "E8", or "Eps-8" is an illegal human biological and
human-technological study testing lab spearheaded by Laboratory Ops Director Robert Brenner, located in the lowest part of the Madison Research Facility. Epsilon-8's purpose of lab testing is to attempt reverse-engineering the capabilities of human beings, generally for weapon testing and science regarding technological advancements within. Testing of the Epsilon-8 division was formatted into generally high type scale testing, and canonically, four labs were created until January 1st, 2000, where the division disbanded.

Tango 4 Enterance

Tango-4 Researcher's Entrance to Epsilon-8.

The Epsilon-8 program appears to be a large portion of QSERF, and a mainstay of it's lore, as there is multiple entrances to Epsilon-8 in the MRC. The main spotted entrances to the Epsilon-8 program are the Foxtrot 9 - Epsilon-8 Cargo Elevator (accessed through a potted plant in the control room), Zulu-7 main entrance in SL-3, SL-4 Lower Entrances & garage doors in the room that the Protocol Saletum Ivy Mike Nuclear Warhead is in, the Basement Level Project: Redstone / Chronos entrance, and the Tango-4 Researcher's Entrance (by Sector C RO CAVERN).

Subjects in Epsilon-8

The Epsilon-8 program had 152 subjects on record between general publication of the Madison Research Facility in 1984. Out of all 152 subjects, nearly half of those subjects were deceased. Quantum Corp. congregated people from general populations via kidnappings as well as baiting their own employees, tourists, and administration members as subjects to the program. The general well-being of the subjects, as well as their needs of food, water, and shelter remains unknown during the operations that commenced.

Funding of Epsilon-8

Quantum Corporation practiced severe accounting tricks and fraud to fund the Epsilon-8 budget via government subsidiary facility budgeting, mainly of use for the Dark Matter Reactor which was being supported by the U.S. Government at the time. To avoid tracing

and possible investigation by the United States Government, the Quantum Corporation opened up and used a black budget to further gather more money for the program that was given via the United State Treasury and government associations, which the United States governments and their alliances had no other information about the whereabouts and any information of a presence of the division. These effects were heavily successful, resulting in a revenue stipend of the Epsilon-8 in the billions. After the events of August 18th, 1985, the Epsilon-8 division was pronounced condemned and no longer was under operations in the Madison Research Center. Due to the budgeting being depleted of the incident, Epsilon-8 continued under a different facility with a limited budget, eventually leading up to the shutdown of the division later in January 1st, 2000 due to severe budget cuts, risky operations and investigation possibilities by third-party corporations. During the operation of Epsilon-8, no information was given by any other corporation except the Quantum Administration Council, select workers to Epsilon-8, and Quantum Defense Firm.

Active Labs

Operation Blackwater

Located in Sublevel 4, Laboratory Deck A contains operation of Operation Blackwater, which began research in 1974 and presently was active until January 1st, 2000, where all forms of Blackwater was destroyed subsequently. Blackwater was led by Doctor F. Everson, and included 10 active patients with 30 reserved patients. Project: Blackwater, as though it was a breakthrough in technology in 1985, was not as effective and yielded less as much results as the scientists hoped Blackwater would present. As reported by the scientists, Blackwater was not as effective unless administered or activated in heavily limited set conditions, where set conditions must be met by preference of persons administered; that easier administration of Blackwater was researched actively more then other subjects, where Blackwater contained near no effect upon testing. One of the patients was Dr. Benjamin Johnson, who was a janitor who was kidnapped, and was introduced to the Blackwater sleeper agent. He was the Maintenance Director during the time of operations of the Madison Research Center under influence of Blackwater. The agent was activated later down the line by the Quantum Corporation to force Johnson to kill Dr. Helene Kaiser for the destruction of the Madison Research Center and his general relation with Dr. Helene Kaiser. The effects of Blackwater resulted in status of prime, as, when activated successfully under parameters, allowed Quantum Corporation to control any persons, reveal any information about person whom was under the agent, and allowed Quantum to straight-out kill the person whom had Blackwater under command if necessary, causing a full cutoff of all brain functions, leading to the irreversible loss of all functions of the brain.

PROCESS OF DIRECT INJECTION INTO A USERS BLOODSTREAM OF MICROAGENTS WITH THE PURPOSE OF CONTROLLING THE SUBJECTS PRIMARY COGNITIVE FEEDBACK METHODS.

THE MICROAGENTS IS RECYCLED THROUGH THE ARTERIAL SYSTEM UNTIL REACHING AND ADHERING TO THE BRAIN UNTIL AWAITED ACTIVATION.

TO ACTIVATE, A DISSOLVED SOLUTION OF [redacted] WILL BE DELIVERED THROUGH THE SAME METHODS TO THE BRAIN, AND WILL RELEASE A NEW COMPOUND OF [redacted], UTILIZED AS A NEURONAL NEUTRALIZANT.
THE NEW COMPOUND WILL BLOCK NEURONAL CONNECTIONS NOTABLY THOSE USED FOR THE NOREPINEPHRINE, DOPAMINE, AND CHOLINERGIC SYSTEMS.
THE MICROAGENTS HAVE A DESIGNED EXPIRATION DATE OF 0/1/JAN/2000 AS PROJECT DEADLINE.
--- Experiment Manifest

Project: Redstone

Located in Sublevel 4 Basement Level, Laboratory Deck B contains operation of Project: Redstone, which began research in 1974 and presently was active until 1975, where all forms of Redstone testing concluded. Redstone was led by Doctor H. Brown, and included 25 active patients with 0 reserved patients. Redstone was heavily inconclusive in results, but generally could've been used to further research ways of making a indigestible & undetectable bio-hazardous weapon for Quantum Science to present to other third party contractors, which was planned for presentation in 1986. Redstone was concluded early due to the lack of subjects for the project, and later down, presentation cancelled due to the August 18th, 1985 incident taking place destroying all forms of Redstone specimens. The effects of Redstone resulted in status of inconclusive, as, when injected successfully under parameters, will coagulate blood, causing blood deprivation in minutes, and lasting 5 hours before the specimen was no longer effective in the body. The project resulted in a survival rate of 28.5% with the death of extremities.

INJECTION OF SOLUTION CONTAINING 0.05 MOL COMPOUND OF [redacted] INTO USER WITH THE OBJECTIVE OF SYNCHRONOUS DELAYED COAGULATION OF THE BLOOD AND CONSEQUENT DEATH.

COMPOUND IS PURPOSED TO RELEASE A REACTIVE AGENT ONCE RECYCLED BLOODSTREAM THAT WILL TRIGGER THE IMMUNOLOGICAL SYSTEM AND COMMENCE TO COAGULATE BLOOD.

EFFECT IS EXPECTED TO MANIFEST 5 HOURS AFTER BEING ADMINISTERED AND LASTS [redacted] MINUTES BEFORE EXPECTED USER DEATH DUE TO BLOOD DEPRIVATION.

COMMERCIALIZATION AS AN INGESTIBLE, UNDETECTABLE BIOHAZARDOUS WEAPON WAS PLANNED FOR 1986 TO BE PRESENTED IN [redacted], [redacted], AND [redacted]
--- Experiment Manifest

Project: Melancholy

Located in Sublevel 4, Laboratory Deck C contains operation of Project: Melancholy, which began research in 1976 and presently was active until 1985, where all forms of Melancholy testing concluded abruptly due to the events of August 18th, 1985. Melancholy was one of the projects that was undergoing research prior to the destruction of the Madison Research Center. Melancholy was led by Doctor H. Brown, and included 5 active patients with 70 reserved patients.

OPERATION COMPARABLE TO A LOBOTOMY SURGERY IN WHICH THE INSIDE CAVITY OF THE CRANIUM IS ACCESSED TO EXTRACT A SMALL PORTION OF THE SUBJECT'S BRAIN, THOUGH IN THIS CASE REPLACED WITH A MOTHERBOARD THAT COMMUNICATES WITH OTHER REGIONS OF THE BRAIN.

THE CHIP IS [redacted]x[redacted]x[redacted] mm IN SIZE AND COMMUNICATES THROUGH

ARTIFICIAL
SYNAPSES FORMED BY THE COMPOUND FORMULATED IN PROJECT BLACKWATER.
THE MOTHERBOARD FEATURES A RADIOFREQUENCY ANTENNA TUNED INTO [redacted] MHz THAT RECEIVES MESSAGES TO RELAY BACK INTO THE CORRESPONDENT BRAIN AREAS.
--- Experiment Manifest

(there is also Project Killjoy, and Project-238)

The Ivy-Mike "Saletum" Warhead is a large Nuclear Warhead that is used to destroy the entirety of QSERF in the event of an Epsilon-8 data breach. The warhead can only be used by the Administration team.

Saletum is a variant of Salutem, a Latin term used to express salutation by Romans that denotes salvation, greeting, prosperity, well-being and health.
The warhead was originally voiced by the FAAS system until it was replaced by a human announcement.
During the priming confirmation sequence, the screen says, "Topside control established, awaiting bottomside confirmation." This implies that there is a topside warhead control room. This is also implied after the arming keys are turned as the announcement states "Warhead control room has authorized the detonation of the facility. The warhead sequence has been engaged."

Project Chronos

Located in Basement Level Project: Chronos is related to the Epsilon-8 program in its status as a secretive project. It placed near to the E-8 labs[1]. Project Chronos is a time travel project that little is known about.
